

Magnetic or magnetic adhesion? What adheres to what kind of material?

We enable fast and flexible sales room designs, no matter what surfaces are to be used!

Magnetic foils...

...allow for direct adhesion to all ferrous surfaces. Our MAGNETOflex foils are flexible, absolutely kink-resistant, extremely durable and printable. In addition, magnetic foil surfaces can be designed using our FERRObase products, for example by means of our ultra-thin and printable FERRO Paper.

Magnetic adhesion...

...is achieved on all non-ferrous surfaces by means of our FERRObase products. Our self-adhesive ferrous foils allow for all kinds of surfaces to be prepared swiftly. In a second step, they can be designed by simple application of our MAGNETOflex foils. All other magnetic products from our TECHNOmag and MAGNETOuse product lines also adhere to FERRObase.

Are you undecided?

Our experts look forward to your inquiries. Together we will find the right solution for you.
